- Remote range - 10 ft
- LED headlights & tail lights
- 4 Road cones for obstacle and precision driving practice
- Built-in rechargeable NiMH battery
- Operating time - 6-8 minutes
- Charge time - approx. 5 minutes

Remote Control

Car

Power Switch ON/OFF

**Docking
Connection**

**Steering
Adjustment**

DC Charging Point

Remote Batteries

Requires 2 AA batteries (not included).

Opening & Undocking the Car

Open the can by gently pulling the top of the can upwards. Detach the car from the remote control by pressing and holding the **Release Button** and gently sliding the car to the right until it is clear of the dock on the remote.

Charging the Car

Before charging, make sure the remote has working batteries. Initial charge time is approximately 5 minutes. Charge fully before use.

1. Flip out the charging cable from the body of the remote and **connect the plug to the DC charging port** on the underside of the car. While charging, the **Charge Indicator** will light up green, and turn off when charging is complete.

Driving

Use the directional controls to move the car forwards and backwards, and steer left or right. Extend the antenna for increased control distance. When driving, the Signal Indicator will light up, indicating that the car and remote are connected and receiving control inputs.

Adjusting Steering

The car may show a tendency to pull to one direction while driving. Use the dial on the underside of the car, between the front wheels, to counter this effect and drive straight.
